

Design & Planning

CIVIL HYDROTECHNICAL ENGINEERING

For
Construction Projects

Stormwater Management Plan
Erosion & Sediment Control Plan
Sump Pump and Site Drainage
Water, Sanitary, Storm Connection
Onsite Wastewater Treatment System (Septic)
Surface Water & Groundwater Assessment
Hydrotechnical Assessment

About Us

ITMBC Enterprises Inc. (ITMBC) was established in 2017 to provide innovative engineering solutions and services in the field of Water Resources and Hydrotechnical Engineering for construction projects. Our professional engineers are certified under the "Engineers and Geoscientists BC (EGBC)" and have more than 30 years of extensive experience in Water Resources and Hydrotechnical Engineering.

We are fully insured and permitted to practice under EGBC regulations.

Why ITMBC?

Every project has its own criteria, and our engineers are here to provide you with the highest level of services, including the following:

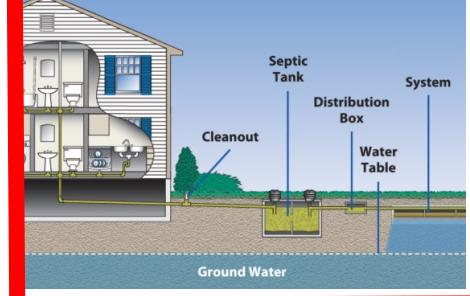

- Site visit and field evaluation pre-, during, and post-construction.
- Collaboration and coordination with other disciplines.
- Regulatory guidance and permitting assistance.
- Conceptual, preliminary, and detailed design of the project complying with industry standards and recognized guidelines.
- Preparing the design packages and deliverables with the most recent software and CAD and GIS systems.

Our engineers at ITMBC have extensive experience, education, and trainings record in hydrology, hydrogeology, hydraulics, water, and wastewater engineering and know how to deal with challenging projects. They Design your projects and field review them during construction according to regulations.

Health, Safety, and Environment (HSE) is a core value at ITMBC!

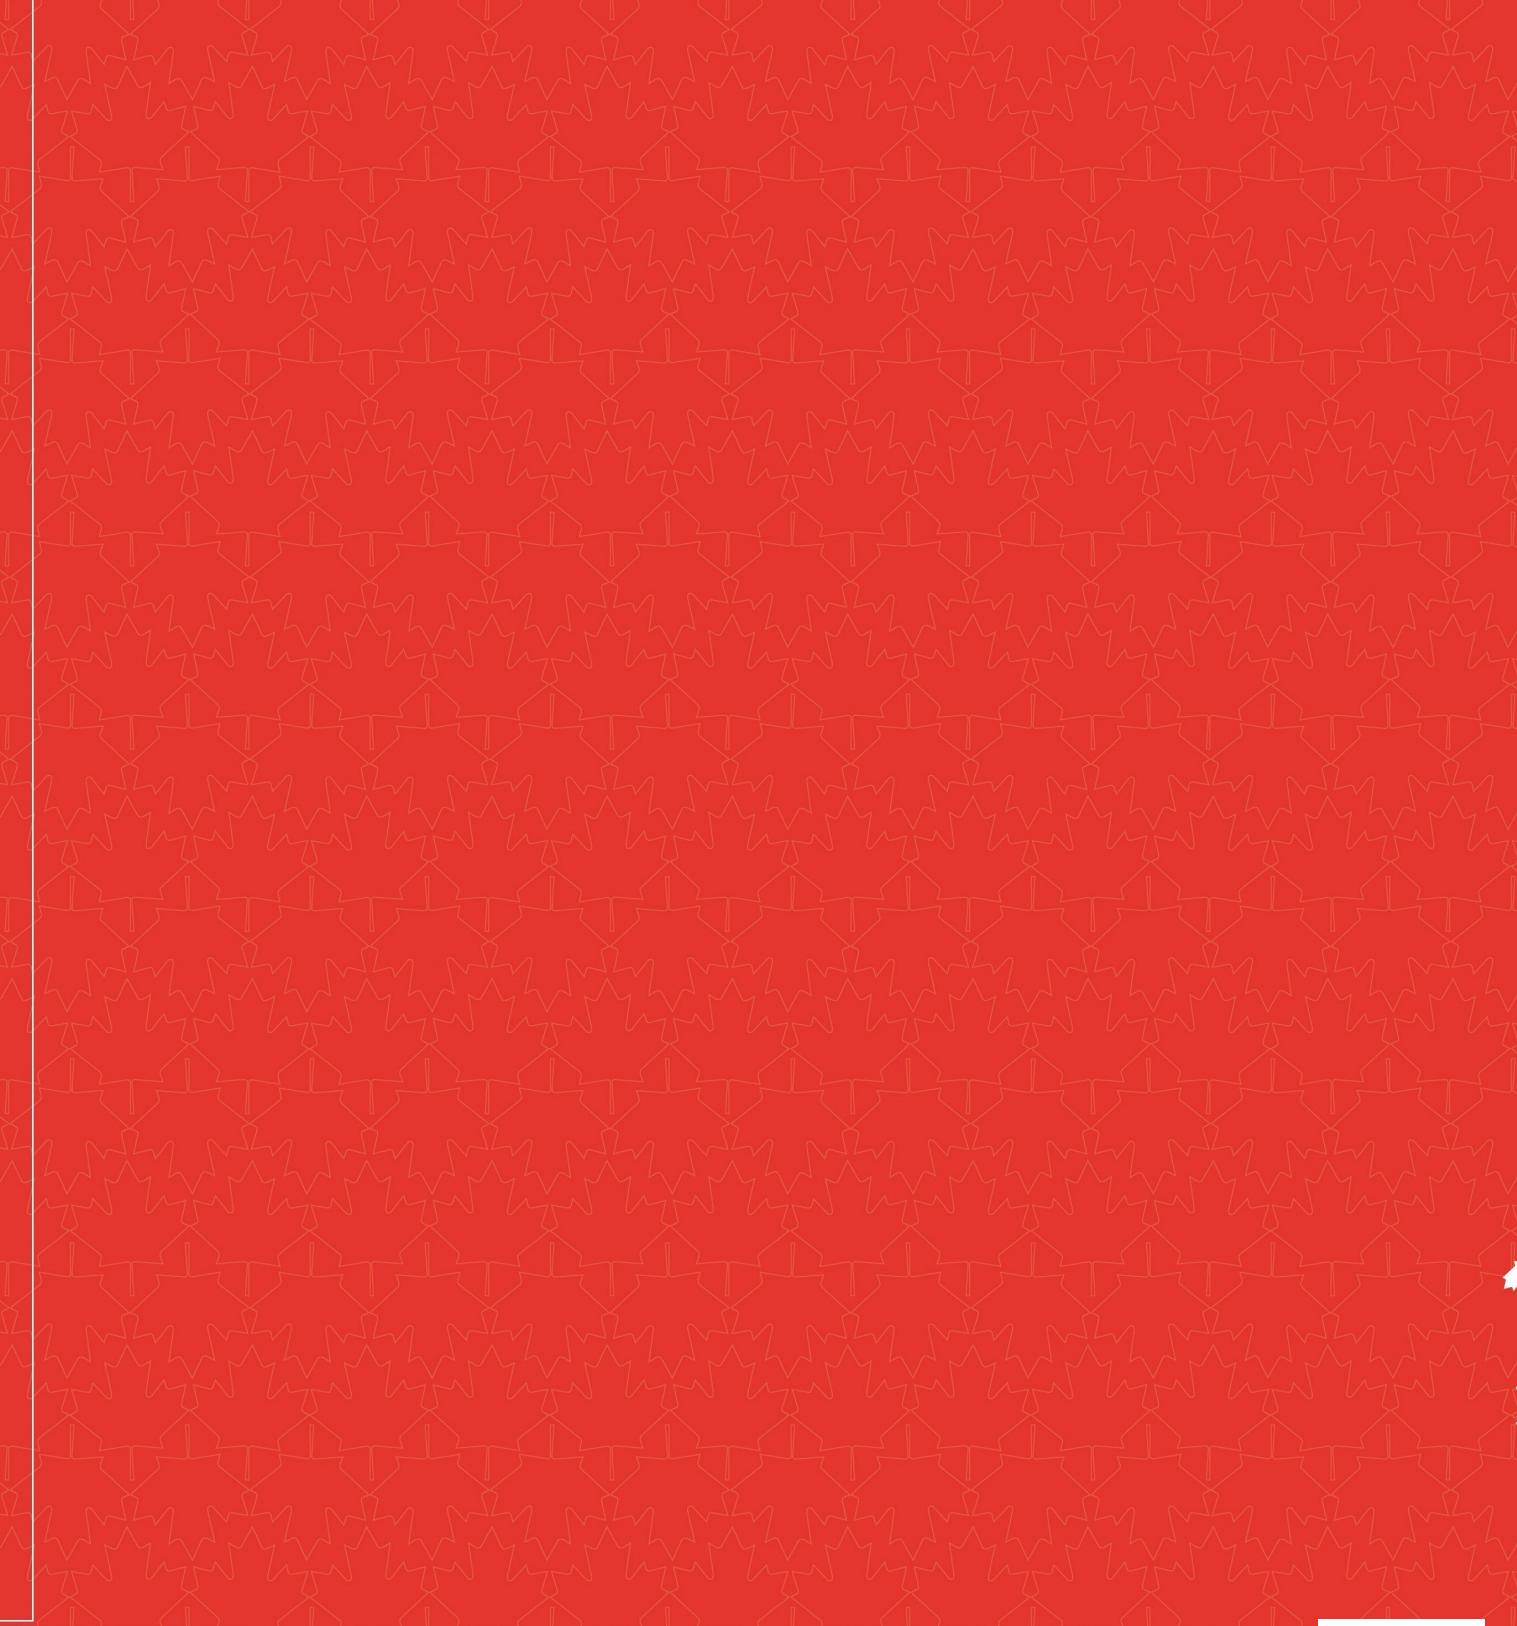

Our Services

- Stormwater Management Plan (SWMP)
- Erosion & Sediment Control Plan (ESCP) and Inspection
- Sump Pump and Site Drainage
- Water, Sanitary, Storm Connection
- Onsite Wastewater Treatment System (Septic)
- Surface Water & Groundwater Assessment
- Hydrotechnical Assessment
